The Alphadogsport
Speed ultra canicross
belt presents itself as
a first-class choice,
offering a
harmonious marriage
between comfort,
safety and
performance.

The key features of this new generation belt:

- Ergonomic design for optimal comfort: The Alphadogsport Speed utra belt is specially designed to adapt perfectly to the runner's body shape. Its ergonomic structure effectively distributes the tension exerted by the dog, thus minimizing the risk of injury and fatigue. Strategically placed padding at the contact zones guarantees exceptional comfort, even during intensive training sessions.
- High-quality materials for increased durability: The Alphadogsport Speed ultra belt is made from high-quality materials, selected for their strength and durability. Reinforced seams and wear-resistant materials guarantee exceptional longevity, even in the most demanding conditions. This harness is designed to resist friction, bad weather and repeated stress, thus offering unrivaled reliability.
- Personalized adjustment system: Each runner has specific belt adjustment needs. We understood this by equipping the Speed ultra with a personalized adjustment system. The adjustable straps allow the harness to be adapted to the size and shape of the runner, ensuring a precise and secure fit. This also helps prevent unwanted movements of the harness while running.
- Safety first: Safety is a top priority in canicross, and the Alphadogsport Speed ultra blet meets this requirement. It is equipped with sturdy attachment points for your dog's leash, ensuring a secure connection and preventing any risk of breakage while running. In addition, reflective elements are integrated into the harness for increased visibility during night training.

Technical characteristics:

Size: one size (belt circumference from 75cm to 125cm)

A LIGHTWEIGHT, HIGH-PERFORMANCE BELT

Our canicross belt is lightweight and adapts to all body types for maximum comfort, balance and performance.

SANGLES RÉGLABLES
Grâce à ses sangles réglable, le baudrier s'adapte à toutes les morphologies

POCHETTE AMOVIBLE

Une poche amovible maintenue par des sangles et un système velcro permet de prendre des petites affaires comme des clefs

Canitrail, a booming activity that combines long-distance outings and complicity with your dog, requires specific equipment for an optimal experience.

The key characteristics of this canitrail belt:

- Ergonomic design for a pleasant trail experience: The
 Alphadogsport Speed trail belt has been carefully designed
 to comfortably adapt to the trail runner's body shape. Its
 ergonomic design effectively distributes the traction exerted
 by the dog, thus reducing the strain on the trail runner's
 body. The strategically placed padding at the contact zones
 guarantees optimal comfort, even during long trail outings
 in varied terrain.
- Personalized adjustment system for a perfect fit: Each trail runner has specific needs in terms of belt adjustment.
 Alphadogsport has taken this into account by providing the Speed trail with a personalized adjustment system. The adjustable straps allow the harness to be adapted to the size and shape of the trail runner, thus guaranteeing a precise and comfortable fit. This also helps reduce unwanted bel movement while running.
- Robust and durable materials for outdoor use: The Alphadogsport Speed trail belt is made from high quality materials, selected for their strength and durability.
 Reinforced seams and wear-resistant materials guarantee exceptional longevity, even in the most demanding trail running conditions. Whether crossing rivers, climbing or rocky passages, this belt is designed to stand the test of time.
- Optimal safety for worry-free hiking: Safety is essential when
 practicing canitrail, and the Alphadogsport Speed trail belt
 meets this requirement. It is equipped with solid attachment
 points for the line, ensuring a secure connection and avoiding
 any risk of breakage during the trail. In addition, reflective
 elements are integrated into the harness for increased
 visibility in low light conditions.
- The Speed trail belt has a large central zipped pocket to carry everything you need to ensure the comfort of your outing. An
 ingenious system of elastics is placed on the central pocket in order to reduce its depth or to hold more equipment there. The two
 exterior bottle holders allow you to take 500ml of water with you divided into two flasks (provided).

BASIC Canicross/Bikejoring/Scooter

A simple and effective solution for canicross and/or bikejoring enthusiasts looking for reliable equipment.

Made with high quality materials and equipped with a lightweight aluminum carabiner with safety screws.

The key characteristics of this bungee line:

- The Alphadogsport Basic canicross and bikejoring/scooter line is distinguished by its simplicity. With a sleek design, it offers a straightforward and functional solution for towed dog sports enthusiasts looking for no-frills but effective equipment. Its minimalist design makes it easy to use, whether you are a beginner or an experienced runner.
- Alphadogsport maintains its commitment to quality with the Basic bungee line. Made with durable and durable materials, this line is designed to withstand the rigors of dog traction activities. The materials are selected to ensure resistance to wear while offering optimal comfort to your dog during exercise.
- The lightweight aluminum carabiner from the Basic bungee line guarantees robust attachment while reducing the overall weight of the equipment. This allows your dog to run without being hampered by excess weight. The lightness of the carabiner also contributes to easy and quick handling, thus optimizing your canicross, bikejoring/scooter experience.
- The bungee line has a carabiner with safety screws, ensuring a secure attachment between the line and your dog's harness. This feature ensures that the connection remains secure during the dynamic movements of the canicross and/or bikejoring/scooter, providing additional security and eliminating the risk of accidental detachment.
- Alphadogsport's Basic bungee line embodies simplicity, quality and safety for canicross enthusiasts. With durable materials, a
 lightweight aluminum carabiner and a safety thread, this line offers everything you need for active and safe adventures with your
 faithful companion. Opt for the effective simplicity of Alphadogsport for hassle-free sports sessions.

The length of the bikejoring line has been designed to adapt to all types of mountain bikes. In canicross, the line is relatively short, which allows use without length hassles

PRO+ Canicross/Bikejoring/Scooter

Designed with a superior quality in-house elastic and equipped with a lightweight aluminum carabiner with safety thread, this bungee line redefines the standards of performance, responsiveness, and lightness in the canicross and bikejoring/scooter market.

The key characteristics of this bungee line:

- Alphadogsport's PRO+ bungee line is a real revolution in performance. Its in-house elastic design and internal development guarantees optimal elasticity, providing dynamic and powerful traction. This results in exceptional responsiveness, allowing your dog to deliver maximum performance during canicross, bikejoring or scooter sessions.
- With the PRO+ bungee line, Alphadogsport has reached the pinnacle of lightness. Thanks to innovative materials and careful design, this bungee line is the lightest in its category. The light weight reduces the load on your dog, allowing it to pull with ease and also provides a bulk-free experience for the runner.
- The PRO+ bungee line is equipped with an aluminum carabiner, combining strength and lightness. This strategic choice helps minimize the total weight of the equipment, promoting increased mobility and optimal performance. Additionally, the safety screw thread ensures a sturdy and reliable connection between the line and your dog's harness.
- The PRO+ bungee line excels in extreme versatility, adapting perfectly to canicross, bikejoring and scootering. Whether you're running, cycling or scootering, this versatile line will meet all your needs. It is designed to perform in all situations.
- Alphadogsport's canicross, bikejoring/scooter PRO+ bungee line marks a significant step forward in the world of dog sports. With its
 in-house bungee, lightweight aluminum carabiner and unrivaled design, this line offers a perfect combination of performance,
 lightness and responsiveness. Choose Alphadogsport PRO+ for adventures with your dog that push the boundaries of excellence.

HARNESS X-back Alpha racer

Featuring an ergonomic X-Back design, this harness offers exceptional performance, optimal comfort and versatility to meet the needs of those who enjoy pulling sports with their dog.

The key features of this x-back traction harness:

- X-Back Design for Optimal Performance: The Alpha Racer X-Back Harness is specially designed with an X-shape across the dog's back, allowing for balanced traction distribution. This design improves traction efficiency, providing optimal performance during canicross, bikejoring/scooter and mushing. The harness allows your dog to pull naturally, reducing the risk of injury and improving speed and endurance.
- Comfort for prolonged efforts: Alphadogsport paid particular attention to comfort when designing the X-Back Alpha Racer harness. It is made from high quality materials that ensure a perfect fit and great feel for your dog. The contact areas are padded to reduce friction and irritation, allowing your dog to wear the harness for long periods of time without discomfort.
- Versatility for different mushing disciplines: The X-Back Alpha Racer harness is versatile and suitable for a variety of mushing activities. Whether you practice canicross, bikejoring, scootering or traditional mushing, this harness will meet your needs. It offers optimal stability and control, allowing you to fully enjoy your favorite discipline with your dog.
- Durability for limitless adventures: Alphadogsport designed the X-Back Alpha Racer harness to withstand the harshest conditions. Made with durable materials and reinforced stitching, this harness is built to last. It is able to withstand the rigors of varied terrain and intense mushing activities, ensuring reliable and durable use over time.
- A strap loop has also been added to the top of the harness to attach a leash, when moving with better control over the dog, as if it
 were attached to a collar.
- Sizes are now more easily identifiable with visual color markers on the harness.

HARNESS

Openback Omega

The Alphadogsport Omega harness is specially designed to meet the demands of canicross, bikejoring and mushing. Whether you prefer to run with your dog, cycle with him or indulge in dog driving, this versatile harness is suitable for all these activities. It offers excellent distribution of the traction exerted by the dog, allowing

for a smooth and efficient

traction experience.

The key features of this x-back traction harness:

- Ergonomically designed for optimal comfort: When
 practicing pulling activities with your dog, comfort is
 essential. The Alphadogsport Omega harness is designed
 with superior ergonomics, providing a precise fit and optimal
 comfort. The contact areas are padded to minimize friction
 and irritation, allowing your dog to move freely while
 reducing pressure on their body.
- Premium materials for maximum durability: We understand the importance of durability when it comes to traction equipment. The Omega harness is made from high quality, wear-resistant materials designed to withstand the most demanding conditions. Reinforced seams guarantee increased strength, ensuring maximum durability even during intensive use.
- Versatility for different mushing disciplines: The Omega harness is versatile and suitable for a variety of mushing activities. Whether you practice canicross, bikejoring, scootering or traditional mushing, this harness will meet your needs. It offers optimal stability and control, allowing you to fully enjoy your favorite discipline with your dog.
- Your dog's safety is our priority. The Omega harness is equipped with strong tow line attachment points, providing a secure connection between you and your dog. Adjustable straps allow for a custom fit to suit your dog's size and shape, ensuring a secure and comfortable fit during activity. The old plastic buckle has been replaced by an aluminum adjustment buckle. In addition, reflective elements are integrated for increased visibility during nighttime outings. A strap loop has also been added to the top of the harness to attach a leash, when moving with better control over the dog, as if it were attached to a collar.
- A strap loop has also been added to the top of the harness to attach a leash, while moving while having better control over the dog, as if it were attached to a collar.

Amarok collar Clips/semi-slip

A collar with a simple design, superior durability and practicality to meet the needs of your faithful companion. Carefully crafted from Alphadogsport's in-house nylon webbing and equipped with a secure clip closure or slide system, this collar offers an optimal experience for your dog.

The key features of this Amarok collar:

- The Alphadogsport Amarok Collar is made with in-house nylon webbing, developed specifically to ensure exceptional durability. Resistant to wear and tear, this material ensures a long life of the collar, even in the most demanding conditions. It is designed to accompany your dog on all his adventures, whether during daily walks or more dynamic activities.
- The clip closure of the Amarok Collar offers a practical and quick solution for attaching and detaching your dog's collar.
 This secure closure ensures the collar stays in place during your dog's movements while providing ease of use for you. No more fiddling with complex buckles, the clip closure simplifies the process for a hassle-free experience. Also available in a semi-choke version.
- The lightweight aluminum hardware is a smart feature of the Amarok Necklace. It adds structural strength without compromising the overall weight of the collar. The lightweight aluminum ensures comfortable wearing for your dog, while ensuring the strength necessary for daily use. It also resists corrosion, ensuring long-lasting appearance and performance.
- Alphadogsport understands that dogs all have different shapes and sizes. That's why the Amarok collar is available in three different sizes, guaranteeing a perfect fit for all canine shapes. Whether you have an energetic little companion or a large, athletic dog, you'll find the perfect size for optimal comfort.
- The Amarok dog collar from Alphadogsport embodies excellence in comfort, durability and adaptability. With an in-house nylon strap, a practical clip closure, lightweight aluminum buckle and three sizes available, this collar meets the requirements of the most demanding dog owners. Choose the Amarok collar to offer your dog a reliable and comfortable everyday accessory.

Amarok leash 1m/adjustable

Made with Alphadogsport's inhouse nylon webbing and fitted with a lightweight 4kn aluminum carabiner, this leash offers a practical and durable solution for all your walks. Available in two lengths, 1m fixed and adjustable, the Amarok leash adapts to your needs while offering optimal comfort to your canine companion. Explore the features that make it a must-have for active dog owners.

Amarok 1m/adjustable leash: Quality, durability and versatility

- The Amarok leash draws its robustness from Alphadogsport's homemade nylon webbing. Developed specifically to withstand daily wear and tear and the demands of outdoor adventures, this strap ensures exceptional longevity. It offers superior resistance while remaining soft to the touch for optimal comfort.
- The Amarok leash meets your specific needs by offering the leash in two convenient lengths. The 1m fixed version is ideal for routine walks, while the adjustable version adapts to various situations. You can adjust the length to your preference, providing maximum versatility for city walks, nature hikes, or any other scenario.
- The lightweight 4kn aluminum carabiner is a key part of the Amarok leash. Robust and reliable, it guarantees secure attachment to your dog's collar or harness. The lightness of the aluminum ensures comfortable wearing for your dog while maintaining unfailing resistance.
- The Amarok leash offers the perfect balance between comfort and control. The soft-touch nylon strap prevents unpleasant friction, while the strength of the leash guarantees optimal control, even with energetic dogs. You can enjoy your walks with confidence, knowing that your dog is well taken care of.
- The Alphadogsport Amarok dog leash embodies quality, durability and versatility. With its homemade
 nylon webbing, two available lengths and lightweight aluminum carabiner, this leash offers a complete
 solution for active dog owners. Opt for the Amarok leash for walks that combine comfort, style and
 reliability.

Racer pad collar

A smart fusion of comfort, durability and design designed for active dogs. Made from nylon webbing and equipped with a clip closure, this collar goes beyond expectations in providing a superior experience for your canine companion. Let's dive into the details that make the Racer pad collar the ideal choice for dog owners looking for the perfect balance of comfort and performance.

The Racer pad collar: Comfort and performance combined

- The Racer pad collar is designed with Alphadogsport's inhouse nylon webbing, ensuring exceptional durability for everyday activities and outdoor adventures. This wear- and tear-resistant material ensures a long life for the collar, making it a reliable partner for all your dog's escapades.
- The lightweight aluminum hardware is a nice feature of the Racer pad collar. It guarantees structural strength without adding excessive weight, ensuring your dog's comfort while maintaining rock-solid durability. Lightweight aluminum also provides corrosion resistance, maintaining the appearance of the collar over time.
- The clip closure of the Racer pad collar simplifies the daily life
 of owners of active dogs. The simplicity of this closure allows
 the collar to be attached and detached in an instant, providing
 optimal comfort for you and increased safety for your dog
 during your outdoor activities.
- The Racer pad collar goes beyond comfort expectations with its 3D mesh padding. This wide, breathable lining provides an extra level of comfort for your dog. It is particularly beneficial for dynamic activities, providing optimal support without compromising the lightness of the collar.
- The Racer pad collar embodies lightness and resistance. Designed to be as light as possible while maintaining exceptional strength, this collar allows your dog to move with ease while withstanding the rigors of outdoor adventures.
- The Alphadogsport Racer pad dog collar combines the essential elements of comfort, durability and lightness. With in-house nylon
 webbing, clip closure, lightweight aluminum hardware, 3D mesh padding and three available sizes, this collar offers the perfect
 balance to meet the needs of all dogs, from the smallest to the largest. Opt for the Racer pad to give your dog an exceptional daily
 wearing experience.

ACCESSORIES Carabiners 4kn/12kn/25kn

Alphadogsport presents a range of lightweight aluminum carabiners, a perfect fusion of modernity, lightness and reliability. Available in three different pulling capacities (4kn, 12kn, and 25kn), these carabiners are designed to meet the demands of active dog owners, dog sports enthusiasts, and mushing professionals.

Modernity, Lightness and Reliability

- The lightness of aluminum is a key feature of these carabiners. Lightweight aluminum provides optimal maneuverability, reducing the overall weight of the equipment without compromising strength. Whether you're canicrossing, bikejoring, or mushing, these carabiners give you a clutter-free experience.
- Each carabiner is equipped with a swivel clasp and screw safety. This combination ensures secure attachment while providing ease of use. The swivel clasp allows for quick connection, while the screw safety ensures a sturdy attachment, eliminating the risk of accidental detachment during dynamic activities.
- The 4kn carabiner features a convenient round finish, ideal for replacing BASIC linelines. Its shape makes it easy to install and remove, providing a practical solution for canicross and mushing enthusiasts
- The 12kn and 25kn carabiners offer impressive pulling capabilities. The 12kn carabiner is capable of withstanding a pull of up to 1200kg, while the 25kn carabiner can withstand forces of up to 2500kg. These high capacities make them suitable for a variety of applications, ensuring maximum safety in all situations.
- Alphadogsport's lightweight aluminum carabiners embody the perfect fusion of modernity, lightness and reliability.
 Whether you're looking for a practical solution for BASIC trait lines or need impressive pulling capabilities, this range of carabiners meets all the needs of active dog owners and dog sports enthusiasts. Opt for modernity and safety with Alphadogsport's lightweight aluminum carabiners.

ACCESSORIES Bungee neckline pro

An essential accessory for dog sports enthusiasts with two dogs. Designed to comfortably and securely connect two athletic companions, the Pro neckline takes advantage of the elastic strap technology found in our PRO+ linelines. This adapted version ensures a perfect balance between flexibility and resistance, allowing the practice of mushing disciplines such as two-dog scootering or driving with exceptional ease.

Perfect connection for exceptional harnessed performance

- The Pro neckline is made with our elastic webbing, similar to that fitted to our PRO+ linelines. This strap offers the elasticity necessary to allow dogs optimal coordination during harnessed activities. Neither too flexible nor too rigid, it offers elasticity adapted to the dynamic movements of dogs, thus promoting their comfort and safety.
- The design of the Pro neckline aims to provide a superior level of comfort and safety when practicing harnessed dog sports with two dogs. The elasticity of the strap allows dogs to work together in synchrony while minimizing jerks and excessive tension. This creates an enjoyable experience for the dogs and makes control easier for the musher.
- The Pro neckline is specially designed for mushing enthusiasts. Whether you're on a two-dog scooter or hitched to a sled, this neckline provides the versatility needed to excel in different disciplines. It allows dogs to work effectively as a team while providing the musher with optimal control.
- The Neckline Pro features sturdy tethers that ensure a secure connection between dogs and mushing equipment. Easy-to-handle fasteners allow for quick installation, providing a seamless transition to your harnessed adventures.
- The Alphadogsport Pro neckline represents the ultimate accessory for dog sports enthusiasts with two dogs. Thanks to PRO+ elastic strap technology, this neckline offers a perfect balance between flexibility and resistance, guaranteeing comfort and safety. Choose the Pro neckline for exceptional harness performance and an unrivaled mushing experience.

ACCESSORIES Bungee neckline basic

An essential accessory for dog sports enthusiasts with two dogs. This simpler version offers a practical and effective solution for connecting two athletic companions when practicing mushing disciplines such as two-dog scootering or hitching. Made with our tubular strap equipped with 6mm elastic, similar to that which equips our BASIC bungee lines, the Basic neckline offers suitable elasticity, thus ensuring comfort and safety.

Simplicity, comfort and safety for mushing with two dogs

- The Basic neckline is designed with our tubular webbing equipped with 6mm elastic, the same proven technology used in our BASIC necklines. This strap provides the flexibility needed to allow dogs to work together harmoniously, minimizing tension and providing a comfortable and safe experience.
- Simplicity is at the heart of the Basic neckline. It offers an effective solution for connecting two dogs without any hassle. The streamlined design ensures easy set-up, while providing a sturdy connection between dogs and mushing equipment.
- The Basic neckline aims to offer optimal comfort to dogs while ensuring the necessary safety. The adapted elasticity of the tubular strap allows dogs to work in a coordinated manner, reducing jerks and minimizing stress on the animals. This makes mushing more enjoyable for the dogs and the musher.
 - Suitable for mushing disciplines such as two-dog scooting or hitching, the Basic neckline offers maximum versatility. Whether you are a canicross, bikejoring or sled enthusiast, this neckline adapts to different situations, providing a reliable way to connect your dogs.
- The Alphadogsport Basic neckline embodies simplicity, comfort and safety for two-dog mushing enthusiasts. With its
 6mm elastic tubular strap, it offers a practical and reliable solution for connecting your athletic companions during
 your harnessed adventures. Opt for simplicity with the Basic neckline and enjoy your mushing activities with
 complete confidence.

LIGHTWEIGHT CARABINER

A light and strong aluminum carabiner equips our BASIC neckline

incorporates durable 6mm marine grade elastic

ACCESSORIES Aluminium mount + antenna

Essential accessory for bikejoring and dogscooter enthusiasts. Designed to ensure safety when practicing dog sports towed on two wheels, this essential element prevents the line from winding in the front wheel. **Precision machined from quality** aluminum, anodized for maximum durability, this mount fits virtually all standard measuring stems. Light, robust and of the best quality, the bikejoring aluminum + antenna support guarantees canine adventures with complete confidence.

Safety and precision for your traction adventures on two wheels

- The bikejoring aluminum mount+antenna is designed with safety as a priority. It effectively prevents the line from rolling into the front wheel, thus offering safe bikejoring and dogscooter practice. This allows the musher and his canine companions to fully enjoy the experience without compromising safety.
- The use of precision machined aluminum gives the stand exceptional quality. Every detail is carefully crafted to ensure optimal performance. Additionally, anodizing provides additional protection against wear, corrosion and external elements, ensuring long-term durability.
- The bikejoring aluminum mount+antenna is designed to adapt to almost all standard stems, offering great flexibility to dog sports enthusiasts. This adaptability makes it easier to integrate support across different equipment, ensuring broad compatibility.
- The whole, light and robust, offers a perfect combination of durability and ease of use.
 Manufactured to the highest quality standards, the bikejoring aluminum+antenna mount is ready to take on the challenges of the most demanding canine adventures.
- The Alphadogsport aluminum mount+ bikejoring antenna is the ultimate accessory to ensure safety and precision when practicing bikejoring and dogscooter. With its carefully machined design, its adaptation to most standard stems, its lightness and its robustness, this superior quality accessory is an essential choice for all enthusiasts of dog sports towed on two wheels. Opt for the best with the Bikejoring Alu mount+Antenna and enjoy canine adventures with complete confidence.

Salmon oil 500ml/1L

Neo Nutrition Salmon Oil is a natural dietary supplement that offers numerous benefits for the health and vitality of your pet. Enriched with omega-3, essential fatty acids and high-quality nutrients, this oil promotes healthy skin, a shiny coat, a strong immune system and improved appetite. Treat your pet to the benefits of fresh Norwegian salmon oil and take care of their health naturally. Trust Neo Nutrition for optimal nutrition for your fourlegged friend.

The key characteristics of salmon oil:

- Salmon oil is made from salmon caught in Norway. The raw material is processed fresh to ensure a high lipid quality product.
- The oil is added with a mixture of tocopherol, lecithin, flavoring compounds (Rosemary extract). It is rich in omega-3, essential fatty acids which improve cardiovascular health, skin and coat quality, and strengthen the immune system. Additionally, this oil helps relieve joint pain and reduce inflammation, which can be helpful for dogs who are subjected to intensive physical activities.
- Finally, wild Norwegian salmon oil may help improve cognitive performance and strengthen memory in dogs, which may be useful for sporting dogs that require increased focus and attention.

Salmon oil 500ml/1L

Composition:

- Omega-3 fatty acids (EPA and DHA): 10 to 30%
- Vitamin A: approximately 5,000 to 10,000 IU/100 ml
- Vitamin D: approximately 400 to 1,000 IU/100 ml
- Vitamin E: approximately 5 to 15 mg/100 ml
- Saturated fatty acids: approximately 5 to 10%

Prix: 22,90€ 500ml/29,90€ 1000ml

Krill oil 500mg

Krill Oil for Sporting Dogs is a naturally powerful dietary supplement to optimize the performance, health and recovery of your athletic companion. With its beneficial omega-3s, anti-inflammatory support, and cognitive benefits, krill oil is a smart choice for active, sports-loving dogs. Give your sporting dog the benefits of premium krill oil and accompany him in his sporting exploits with confidence and support. Maximize its performance and take care of its health naturally with our highly beneficial krill oil.

The key characteristics of krill oil:

- This oil comes from 100% Antarctic krill (Euphausia superba). Krill is a small zooplankton shrimp eaten by whales. Krill oil is rich in omega-3, antioxidants and phospholipids, making it a very beneficial dietary supplement for sporting dogs.
- Omega-3s can help reduce inflammation, improve heart health and strengthen the immune system.

- Antioxidants can help protect cells from damage caused by free radicals.
 Phospholipids may help improve brain function and memory.
- We certify that this product is not derived from or manufactured from genetically modified organisms. The product has not undergone any treatment with ionizing radiation and does not contain any ingredients treated with ionizing radiation.

Krill oil 500mg

Composition:

- pure krill oil 500mg
- Phospholipids 200mg
- EPA 50mg
- DHA 27,5mg
- Astaxanthin 0.1mg

Spirulina

Spirulina for sporting dogs is a naturally powerful supplement that can help optimize your pet's performance, health and recovery during sporting activities. By providing essential proteins, vitamins, minerals and antioxidants, spirulina offers valuable nutritional support for sporting dogs. Offer your fellow athlete the benefits of spirulina and maximize their performance while taking care of their health in a natural way. Trust our superior quality spirulina to accompany your dog in his sporting exploits.

The key characteristics of spirulina:

- The main quality of spirulina is its very high protein level, more than 60%. These are vegetable proteins, which have the same advantages as animal proteins. In addition, many vitamins are also present in its composition. The main advantage of spirulina is that it is an excellent source of protein.
- Its high concentration of iron is also perfect for anemia problems. Recognized today as a "superfood", it helps boost the immune system, fight against malnutrition, promote the reduction of cholesterol in addition to bring a host of trace elements to the body.

- Miracle algae is also particularly interesting for athletes: it has been found that its consumption promotes recovery after exercise, thanks to its richness in proteins and minerals.
- We certify that this product is not derived from or manufactured from genetically modified organisms. The product has not undergone any treatment with ionizing radiation and does not contain any ingredients treated with ionizing radiation.

Spirulina

Composition:

- Protein 50 to 60%
- Carbohydrates 14 to 18%
- Lipids 2 to 9%
- Minerals 5 to 12%
- Phycocyanin 10 to 12%
- iodine less than 2000 ppm

Optimal joint protection

Give your sporting dog optimal joint protection with Optimal Joint Protection. This specially formulated powder, rich in essential nutrients, supports joint health, promotes mobility and contributes to a better quality of life. Give your fellow athlete the care he needs to continue enjoying his favorite sporting activities, without compromising his joint health. Choose Optimal Joint Protection and ensure peak performance.

The key features of our Optimal seal protection:

- This food supplement based on green mussel flesh, glucosamine, chondroitin and harpagophytum for sporting dogs is a combination of different ingredients that can help improve the joint health and mobility of dogs.
- By combining these ingredients, this dietary supplement for sporting dogs can help maintain joint health, prevent joint injuries, and relieve pain and inflammation associated with joint problems. It can also help improve the mobility and agility of sporting dogs, allowing them to perform to the best of their abilities.

- The strong points of Optimal joint protection:
- 1.-Powdered green mussel meat is a natural source of glucosamine and chondroitin, two compounds that help maintain joint and cartilage health.
- 2. Glucosamine powder is a naturally occurring compound in the body that can help strengthen joints and cartilage.
- 3. Chondroitin powder is a compound that helps maintain cartilage elasticity and prevent its breakdown.
- 4. Harpagophytum powder, also known as "devil's claw," is used for its anti-inflammatory and analgesic properties, which may help relieve joint pain and inflammation.

Optimal joint protection

Composition:

- 60% green mussel flesh powder
- 20% glucosamine powder
- 10% chondroitin powder
- 10% harpagophytum powder

Price: €32.90 200g

Regeneo

Give your sporting dog the care he needs for optimal recovery with Regeneo. This advanced recovery formula, rich in essential nutrients, supports muscle recovery, reduces inflammation and promotes regeneration. Provide your fellow athlete with the best care so they can continue to perform at the highest level and stay healthy. Choose Regeneo and give your sporting dog a competitive edge.

The key features of Regeneo:

- Our recovery and regeneration mixture is obtained from powdered fish oil 18/12 TG (70% m/m), marine lechitin and squid protein.
 Powdered fish oil provides fatty acids EPA type (18% of total fatty acids) and DHA (12% of total fatty acids). These two omega fatty acids have vasodilatory, cardioprotective and anti-inflammatory properties. These properties contribute to recovery after exercise. In addition, the support used for the production of the powder is maltodextrin which provides the essential source of energy after exercise. Powdered fish oil is palatable.
- Squid flour (22% m/m) Squid flour is an excellent source of marine proteins characterized by a very strong palatability. Its strong smell and taste contribute to the acceptance of the formulation by the dog.
- Marine lecithin powder (8% m/m) Marine lecithin is an important source of DHA provided to the body in the form of phospholipids. In this form, DHA is better assimilated than in traditional triglyceride forms.
 Powdered marine lecithin is currently being studied in humans and particularly in athletes for its ability to increase V02 max. Powdered marine lecithin is also a source of astaxanthin which is a natural antioxidant.

- · The strong points of Régéneo:
- Improved cardiovascular health: Fish oil contains omega-3 fatty acids, which have been linked to better cardiovascular health in dogs. Omega-3s may help reduce inflammation, improve blood circulation, and reduce the risk of heart disease.
- 2. Supporting Brain Function: The omega-3 fatty acids in fish oil may also support brain function in active and athletic dogs. Omega-3s are essential for brain health and can help improve cognition, memory and concentration.
- 3. Reduction of inflammation: Fish oil contains anti-inflammatory omega-3 fatty acids that can help reduce inflammation in dogs' bodies, which may be especially beneficial for active and sporting dogs who are prone to to injuries or muscle pain.
- 4. Immune System Support: The omega-3s in fish oil may also help support dogs' immune systems by reducing inflammation and improving immune cell function.
- 5. Improved skin and coat health: The omega-3 fatty acids in fish oil may help improve the health of dogs' skin and coat by reducing inflammation, increasing hydration, and improving the shine and texture of the coat.
- 6. Support Joint Health: Squid meal contains chondroitin and glucosamine which may help support joint health in active and athletic dogs, who may be more prone to joint injuries.
- 7. Improved Digestion: Marine Lecithin may help improve fat digestion and reduce digestion problems in active and sporting dogs who require a high-fat diet for energy.

Protein power

Give your athletic dog the nutrients he needs to build and rebuild muscle with Protein Power. This specially designed formula, rich in high-quality protein and essential nutrients, stimulates muscle growth, promotes recovery and maintains athletic performance. Trust Protein Power to support your dog's athletic potential and help them achieve exceptional performance.

The key features of Protein power:

- This powder is obtained from squid (Dosidicus gigas) caught in the South-East Pacific. The flour is obtained after grinding and drying squid from the industrial processing of whole wild squid. Super Prime quality is a quality without viscera.
- Squid meal is a rich, quality source of protein for sporting dogs. It
 contains a high amount of essential amino acids, which are the
 building blocks of proteins necessary for the growth and repair of
 muscle tissue. The protein in squid meal is also easily digestible,
 meaning it can be absorbed and used by the sporting dog's body more
 efficiently than some other protein sources. This can help support
 muscle growth, exercise recovery and overall dog performance.
- Additionally, squid meal also contains high levels of omega-3 fatty acids, which are beneficial for a dog's overall health, including skin and coat health, cardiovascular health, and cognitive function.

- · The strengths of Protein power
- 1.Improved Muscle Recovery: Protein and amino acids are essential for the repair and regeneration of muscle tissue damaged during exercise. Supplementing with protein and amino acids immediately after exercise can help speed muscle recovery and reduce pain and inflammation.
- 2. Maintenance of muscle mass: Protein and amino acids are also important for maintaining muscle mass in sporting dogs, who have high protein requirements to support their physical activity. Supplementing with protein and amino acids immediately after exercise can help prevent muscle loss and promote muscle growth.
- 3. Reduced risk of injury: Protein and amino acids are also important for maintaining the health and strength of tendons and ligaments. A postexercise intake of protein and amino acids can help reduce the risk of exercise-related injuries, by strengthening the body's support structures.
- 4. Increased Endurance: Protein and amino acids are also important for supporting endurance and overall athletic performance. An intake of protein and amino acids can help maintain high levels of energy and strength during exercise, which can improve performance and recovery.

The Nova outdoor Explorer canicross/cani hike belt: Combine adventure and comfort with your dog! Cani hiking, a booming activity that combines hiking and bonding with your dog, requires quality equipment for an optimal experience.

The Nova outdoor Explorer canicross/cani hiking belt is the ideal accessory, offering a perfect blend of comfort, safety and functionality.

Here are the key characteristics of this belt, specially designed for canicross and especially cani hiking:

- Ergonomic design for a pleasant hiking experience: The Nova outdoor Explorer belt has been carefully designed to comfortably adapt to the body shape of the hiker or canicrosser. Its ergonomic design effectively distributes the traction exerted by the dog, thereby reducing strain on the hiker's body. Strategically placed padding at the contact zones guarantees optimal comfort, even during long hikes in varied terrain.
- Personalized adjustment system for a perfect fit: Each
 canicrosser/hiker has specific needs in terms of belt adjustment.
 Alphadogsport has taken this into account by equipping the Explorer
 with a custom tuning system. The adjustable straps allow the harness
 to be adapted to the size and shape of the hiker, thus guaranteeing a
 precise and comfortable fit. This also helps reduce unwanted belt
 movement while walking.
- Robust and durable materials for outdoor use: The Nova outdoor Explorer belt is made from high quality materials, selected for their strength and durability. Reinforced seams and wear-resistant materials guarantee exceptional longevity, even in the most demanding conditions of canirando or canocross. Whether crossing rivers, climbing or rocky passages, this harness is designed to stand the test of time.
- Optimal safety for worry-free hiking: Safety is essential when practicing canirando, and the Nova outdoor belt meets this requirement. It is equipped with strong attachment points for your dog's leash, ensuring a secure connection and preventing any risk of breakage while hiking. In addition, reflective elements are integrated into the harness for increased visibility in low light conditions.
- The Nova outdoor Explorer canicross/canirando belt offers a perfect combination of comfort, safety and durability for an
 unforgettable canicross experience with your faithful companion. Thanks to its ergonomic design, personalized fit and priority
 given to safety, this harness is an ideal choice for canirando enthusiasts looking for reliable and high-performance equipment

Nova Outdoor proudly presents the Gamma Harness, a versatile piece of equipment designed for enthusiasts of towed hikes, canicross and canivtt. Specifically developed to ensure optimal traction distribution, the Gamma offers unrivaled comfort and maximum freedom of movement for dogs during their runs. Featuring a longer, fitted structure, adjustable at the chest for an optimal fit, and made with quality materials, this reflective harness ensures maximum visibility during your nighttime adventures.

The Nova Outdoor Gamma harness: Comfort, freedom of movement and maximum safety for your traction adventures

- The Gamma harness from Nova Outdoor has been meticulously designed to provide exceptional comfort and optimal freedom of movement during pulling activities. Its longer, fitted structure allows the dog to run naturally while ensuring effective traction distribution to avoid any discomfort.
- Optimal fit is essential to ensure comfort and performance.
 The Gamma is adjustable at the chest, allowing for a personalized fit based on your dog's size. This ensures a secure fit while allowing your canine companion to move freely.
- Made with premium materials including cordura and nylon, the Gamma harness stands up to the rigors of outdoor adventures. These durable materials ensure a long life of the harness, even in harsh conditions.
- Safety is a priority, especially when going out at night. The Gamma is equipped with reflective details, ensuring maximum visibility in low light conditions. This ensures added safety for you and your dog during your nighttime adventures.
- The Gamma harness from Nova Outdoor is much more than just a harness. It is a reliable companion for your towed hiking, canicross and canivtt adventures. With its exceptional comfort, freedom of movement, optimal fit and reflectivity, the Gamma meets the demands of active dog owners. Opt for quality with the Gamma harness and transform every outing into a comfortable and secure pulling experience for your faithful companion.

Nova Outdoor proudly presents the Zetta Harness, a versatile companion designed to meet your dog's daily needs. Adjustable at the neckline and chest, equipped with a handle on the back and a specific attachment for an identification medal, the Zetta offers optimal comfort thanks to its mesh padding. Reinforced with "bartack" type seams at sensitive points, this harness is extremely robust. Made with quality materials, including cordura and nylon, and featuring night reflectivity, the Zetta harness ensures unrivaled safety and comfort.

The Zetta harness from Nova Outdoor: Daily versatility, comfort and enhanced safety

- The Zetta harness was designed to be your everyday companion. Whether for a simple walk or a more intensive training session, the Zetta offers exceptional versatility to adapt to any situation. The perfect fit is essential for your dog's comfort. The Zetta is adjustable at the neckline and chest, allowing precise adaptation to the shape of your companion. This ensures an optimal fit, reducing any risk of friction or discomfort.
- The convenient handle on the Zetta's back provides a safe way to control your dog when necessary. The specific ID tag clip adds an extra layer of security, ensuring your four-legged friend can be identified when needed.
- The Zetta gets its light weight from its mountain rope attachment system. This clever design ensures optimal lightness, providing your dog with a comfortable wearing experience. Mesh padding on the chest and back provides additional comfort to the Zetta. This allows your dog to wear the harness for extended periods of time without sacrificing comfort.
- The robustness of the Zetta is ensured by "bartack" type seams at sensitive points. This reinforces critical areas of the harness, ensuring exceptional durability even under heavy use conditions. Made with quality materials including cordura and nylon, the Zetta stands up to the rigors of everyday use. Its nighttime reflectivity adds an extra layer of safety during nighttime outings.
- The Zetta harness from Nova Outdoor is much more than just an accessory. It is a reliable companion, offering versatility, comfort and enhanced safety for your dog on a daily basis. Opt for quality with the Zetta harness and give your canine companion an unparalleled wearing experience.

BUNGEE LINE

Basic

Nova Outdoor enthusiastically presents its canirando/canicross bungee line, essential equipment for hiking or running enthusiasts with their faithful four-legged companion. Packed with practical and safety features, this line offers optimal control, maximum safety, and exceptional versatility for uncompromising outdoor adventures.

The Nova Outdoor canirando/canicross bungee line: Optimal control, maximum safety, and versatility in the great outdoors

- The Nova Outdoor canirando/canicross bungee line is equipped with a dog side handle, offering precise control of your companion. Ergonomic and comfortable, this handle helps guide your dog safely, allowing you to anticipate their movements and maintain a constant connection during your outdoor adventures.
- Safety is the top priority, and that's why the Nova Outdoor bungee line is equipped with a safety thread carabiner on the human side. This feature ensures a reliable and strong connection between you and your dog, with a secure closure. This reduces the risk of accidental detachment, providing peace of mind during dynamic movements.
- The dog side of the canirando/canicross bungee line is equipped with a stainless steel carabiner. Resistant to wear, humidity and corrosion, this stainless steel ensures maximum durability in the harsh conditions of the outdoor environment. You can trust the strength of this connection, even in the most demanding situations.
- The Nova Outdoor canirando/canicross bungee line offers exceptional versatility, suitable for both canirando and canicross. Whether you opt for a leisurely hike with your dog or an active run, this line is designed to meet your specific needs. It guarantees the comfort and safety of your dog, allowing you to fully enjoy your outdoor adventures.
- The Nova Outdoor canirando/canicross bungee line is much more than just a piece of equipment. It's the bond that connects you to your dog during your outdoor escapades, providing optimal control, maximum safety, and exceptional versatility. Choose excellence for your canine adventures with the Nova Outdoor bungee line.

This high-end vest offers a perfect combination of functionality, comfort and visibility, allowing you to enjoy your nautical adventures with your faithful friend in complete peace of mind.

Sigma flotation and safelife vest from Nova Outdoor: Safety and optimal comfort for your canine aquatic adventures

- The Sigma Vest offers a precise fit thanks to an innovative sliding system at the neckline and chest level. This custom adjustment helps tailor the vest to your dog's specific size and shape. This ensures a secure and comfortable fit for all your water activities.
- Equipped with dense foam filling, the Sigma Vest ensures
 exceptional buoyancy. Specially designed foam keeps your
 dog atop the water, providing complete peace of mind during
 your water adventures. The balanced distribution of
 buoyancy guarantees the comfort and stability of your dog in
 all circumstances.
- The solid handle located on the top of the Sigma vest allows rapid intervention if necessary. Easily graspable, it allows you to get your dog out of the water with ease, whether in emergency situations or simply to make getting in and out of the water easier.
- The Sigma Vest is equipped with strategically placed reflective elements, ensuring exceptional visibility even in low light conditions. These reflective elements make it easier to spot your dog in the water, thus increasing their safety. You can thus peacefully enjoy your nighttime adventures or in foggy weather.
- The Sigma flotation and life vest from Nova Outdoor is much more than just a vest. It guarantees the safety and comfort of your canine companion during your aquatic adventures. With a personalized fit, superior buoyancy, a convenient rescue handle and increased visibility, the Sigma Vest is the essential accessory for all your water adventures with your dog. Opt for peace of mind with the Sigma vest.

Neo collar (neoprene)

Nova Outdoor proudly presents the Neo collar, an essential accessory for active dogs. Designed to provide maximum comfort and exceptional resistance, this collar combines simplicity, practicality and visibility to accompany your four-legged companion on all your outdoor adventures.

Neo Nova Outdoor Collar: Comfort, resistance and visibility for your adventurous companion

- The Nova Outdoor Neo collar features a simple and effective design, offering optimal adaptability to the size of your dog's neck thanks to its adjustment function. Thus, a perfect and comfortable fit is ensured, guaranteeing the well-being of your companion.
- Made from high quality nylon webbing, this collar is resistant
 to the most intense activities. Sturdy and durable, it can
 withstand your dog's tugging and dynamic movements
 without deforming, ensuring a long service life. Available in a
 bright orange color, the Neo collar improves your dog's
 visibility in varied outdoor environments. Whether in forests,
 parks or on trails, this bright color makes it easy for other
 walkers, cyclists or drivers to spot your dog, thereby
 increasing their safety.
- The Nova Outdoor Neo collar is equipped with soft and comfortable neoprene padding, providing a pleasant feeling in contact with your dog's skin. This padding reduces friction and irritation, ensuring comfortable wear, even during prolonged periods of use.
- The solid aluminum D-ring buckle allows for easy attachment
 of the leash to the collar. Resistant and secure, it ensures a
 solid connection between the collar and the leash, avoiding
 any risk of breakage or accidental detachment. Equipped with
 a new generation durable plastic clip, the Nova Outdoor Neo
 Collar offers a secure, easy-to-use and shock-resistant closure.
 This clip ensures the collar stays in place, even during
 energetic activities.
- The Neo Nova Outdoor collar is more than just an accessory, it's a trusted companion for your active dog. Combining comfort, resistance and visibility, this collar will accompany you on all your outdoor adventures, offering your canine companion the best in terms of well-being and safety. Opt for the Neo necklace and experience unforgettable moments with your faithful friend.

Collier Pad (mesh 3D)

Nova Outdoor proudly presents the Neo collar, an essential accessory for active dogs. Designed to provide maximum comfort and exceptional resistance, this collar combines simplicity, practicality and visibility to accompany your four-legged companion on all your outdoor adventures.

Nova Outdoor pad collar: Optimal comfort, resistance and exceptional visibility for your adventurous companion

- Nova Outdoor presents the Collar Pad, a technical and highly functional accessory designed to meet the needs of active dogs. With its skilful marriage of exceptional comfort, resistance and optimal visibility, this collar is the ideal accompaniment for all your outdoor adventures with your faithful four-legged companion. Made from high quality nylon webbing, this collar is resistant to strain and pulling. Durable, wear-resistant, it guarantees long-term use even in harsh outdoor environments.
- The solid aluminum D-ring buckle allows for secure attachment of the leash to the collar. Resistant and durable, it ensures a reliable connection between the collar and the leash, eliminating any risk of breakage or accidental detachment.

- Equipped with a new generation plastic clip, the Nova Outdoor Pad Collar offers a solid and easy-to-use closure. Resistant to shocks and sudden movements, this clip ensures increased safety during dynamic activities.
- The Collar Pad features a black and orange color combination, embellished with reflective edging. This intelligent design ensures maximum visibility, even in low light conditions. This way, you can easily spot your dog, increasing their safety during your nighttime outings or in foggy weather.

• The Nova Outdoor Pad Collar offers much more than a simple attachment. It is a companion that ensures the well-being, resistance and safety of your dog during all your adventures. Opt for the Collar Pad and offer your canine companion an unrivaled outdoor experience.

Adjustable Pocket Leash

The Nova Outdoor Pocket
Adjustable Leash is not only
a way to connect your dog to
you, it is an essential
accessory that combines
practicality, safety, and a
touch of smart style to make
your daily life with your
canine companion easier.

Pocket Nova Outdoor adjustable leash: Everyday safety and functionality

- The Pocket Adjustable Leash is more than just a leash. It has an ingenious pocket that allows you to carry your keys, identification papers, or even some treats for your dog. The pouch is equipped with a waterproof zip, ensuring the protection of your valuables against bad weather.
- The pouch, as well as the leash fabric, are made of waterproof cordura. So you can go out in the rain with confidence, knowing that your belongings will stay dry and the leash will not be affected by the weather conditions. The neoprene handle is not only soft and comfortable to hold, but also provides a comfortable, non-slip grip. So even during prolonged walks your hand remains comfortable.
- The Pocket Adjustable Leash is available in two sizes to perfectly suit your needs. Whether you have a small companion or a larger dog, this leash will meet your expectations.
- A small detail that makes all the difference: smart storage for poop bags. So, during your walks, you always have what you need on hand to keep the environment clean. Safety first. The leash is equipped with a strong aluminum 4kn "twistlock" carabiner. This mechanism provides a sturdy and secure attachment, ensuring that your dog remains securely attached at all times.
- The Nova Outdoor Pocket Adjustable Leash transcends the expectations of a simple leash. It becomes a trusted companion, a practical storage space, and a functional style element to make your outings with your dog easier. Opt for the Pocket Adjustable Leash and make each walk a moment of shared comfort and safety.

Softshell Cold weather

Discover our Coldweather Nova Outdoor softshell coat, specially designed to keep your dog warm on cold and wet days.

This coat combines lightness, warmth and protection against bad weather, offering your four-legged friend optimal comfort during your outdoor adventures.

Whether for a winter walk, a hike or a cold weather play session, this Softshell coat is the ideal option to protect your dog from the elements.

The Cold weather softshell is a powerful ally against the cold

- Lightness and mobility: The Coldweather Nova Outdoor Softshell Coat is designed with a lightweight fabric that allows maximum freedom of movement for your dog. It does not restrict his movements, which allows him to fully enjoy his activities while remaining comfortably dressed.
- Warmth and insulation: This coat features an insulating layer that maintains your dog's body heat, protecting them from cold temperatures. It provides increased protection against drafts and helps prevent hypothermia during winter outings. Comfort and optimal fit: The Coldweather Nova Outdoor Softshell Coat is equipped with adjustable straps at the neck and abdomen, providing a personalized fit to perfectly adapt to your dog's body shape. It also ensures comfortable wearing thanks to its soft and non-irritating lining.
- Weather resistance: The Softshell fabric used in the design of this coat is waterproof and windproof. It protects your dog from moisture, light rain and sleet, allowing them to stay dry and comfortable even in wet weather.
- Increased Visibility: This coat is available in bright colors and is equipped with reflective elements to ensure better visibility of your dog in low light or in the dark, improving their safety during your nighttime outings.

• The Coldweather Nova Outdoor softshell coat is the ideal choice for keeping your dog warm, dry and comfortable on cold, wet days. Its lightness, warmth and weather resistance make it a versatile coat for all your outdoor activities. Give your canine companion the comfort and protection they need with this quality Softshell coat. Get ready to fully enjoy your winter adventures while keeping your dog happy and well protected.

MAXIMUM PROTECTION

The structure of the softshell coat is made to effectively protect all the sensitive parts of the dog

Musher's Secret is a 100% natural, food-grade wax that forms a breathable barrier for your pets' paws. Originally developed in Canada for use with sled dogs, Musher's was first seen as a cold weather solution. It is now used for year-round protection in many different environments. Made from a blend of several foodgrade organic waxes, then refined to their own special formulations, Musher's Secret is the safe, non-toxic, non-allergenic way to protect your dog's paws and is 100% edible. The semi-permeable shield is absorbed into the paws, allowing sweat to escape through the toes.

Musher's secret wax

Musher's Secret Dog Paw
Protection Wax, a 100% natural
solution, is the ideal answer to
protecting your pet's paws.
Originally developed in Canada
for sled dogs, this wax provides a
breathable barrier for the paws,
providing year-round protection
in a variety of environments.

Here are the characteristics of Musher's secret wax:

- Made from a blend of food-grade organic waxes and ethically sourced oils, with vitamin E, Musher's Secret is non-toxic, non-GMO, and gluten-free. This stable formulation has an indefinite shelf life and is free from nuts, soy, and flaxseed oil.
- Protection from a multitude of elements: Protect your pets from sand and burns, salt residue, melted ice, ice build-up, snowballing, hot asphalt, rough terrain, pesticides, lawn fertilizers, and much more! For year-round use, apply a thin layer 2 to 3 times a week and rub well. It will be absorbed within moments, and once absorbed, it will not leave marks on floors, carpets or clothing.
- Musher's Secret can be used on all parts of the body, including paws, muzzle, ears, elbows and nipples. It soothes, conditions and relieves dry, cracked paws. In snowy conditions, additional applications may be necessary. To prevent snowballing, scrub between and around the pads.
- The semi-permeable formula is absorbed by the paws, allowing perspiration to escape through the pads, preventing moisture build-up.

• Give your pet the natural and safe protection it needs with Musher's Secret Dog Paw Protection Wax. No matter what adventures you share, this wax guarantees comfort, safety, and well-being all year round.
